PROFILE

B.Tech student graduating in 2027 with strong foundations in Data Structures & Algorithms, Java, Object-Oriented Programming, DBMS, and software development. Experienced in building full-stack web applications using JavaScript, React.js, Node.js, Express.js, REST APIs, MongoDB, and SQL. Hands-on experience developing database-backed workflows, implementing authentication, API validation, error handling, and scheduled background jobs. Familiar with Git, Docker, and client-server architecture.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, HTTP/HTTPS, API Integration, JWT

Databases: MySQL, MongoDB, MongoDB Atlas, Mongoose, Database Design

Development & Testing: Git, GitHub, Postman, Docker, API Validation, Error Handling, Rate Limiting

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

AI / LLM: LLM APIs, AI Agents, Agent Workflows, LLM Evaluation, Groq SDK, Llama 3.1

PROJECTS

1. Gharpayy CRM — Full-Stack CRM & Workflow Platform

Live | GitHub

React.js, Node.js, Express.js, MongoDB Atlas, Mongoose, JWT, REST APIs, node-cron

- Built and deployed a full-stack web application for lead management, property visits, agent assignment, follow-ups, sales pipelines, and automated workflows.
- Designed **7 REST API endpoints** across lead, visit, and dashboard workflows with modular controllers, API validation, and consistent error handling.
- Implemented least-loaded-agent auto-assignment, hourly **node-cron** scheduled processing for inactive leads, and MongoDB **aggregation and populate** for dashboard analytics.

2. PrepWise AI — AI Interview Platform

Live | GitHub

React.js, Node.js, Express.js, MongoDB, Groq SDK, Llama 3.3-70B, REST APIs

- Built an AI-powered web application with a **4-endpoint REST API** for resume processing, interview generation, response evaluation, and report generation.
- Integrated Groq's LLM API for structured resume extraction with **3-attempt exponential-backoff retries**, safe parsing, and centralized error handling.
- Implemented **tiered rate limiting**, PDF upload validation, environment validation, and Docker deployment; tested REST API workflows using Postman.

3. AI Journal System — AI-Powered Web Application

Live | GitHub

React.js, Node.js, Express.js, MongoDB, Groq SDK, Llama 3.1, REST APIs

- Built a **5-endpoint REST API** for journal creation, retrieval, AI emotion analysis, aggregated insights, and deletion with input validation and error handling.
- Integrated Llama 3.1 through Groq with result caching to reduce redundant LLM calls and graceful fallback handling for external AI failures.
- Built an insights workflow aggregating user history into top emotion, most-used context, and recent keywords using MongoDB-backed application data.

HACKATHONS & RECOGNITION

- **Puduvai Innovation Competition 2026:** Top 50 among 250+ teams with GramDoc AI, a multilingual rural-assistance solution.
- **CodeStreet 2026 — American Express:** Developed Tripy, an autonomous travel-disruption concierge using multi-agent AI.
- **HackWithInfy Qualifier — Infosys:** Completed and submitted all three problem sets in the national hackathon qualifier.
- **Adobe University Hackathon 2026:** Participated in the university hackathon and advanced through the screening round to the first round.

EDUCATION

Puducherry Technological University

Puducherry, India

B.Tech. in Electronics & Communication Engineering

2023 – 2027
